Ricardo Hurla
Lead iOS Developer

⚇ Profile

I am a seasoned Lead iOS developer with extensive experience crafting and managing iOS applications. I have had the privilege of working with a variety of organisations throughout my career, from agile startups to well-established organisations, always delivering my best to help them achieve their business objectives and contributing to a variety of teams and stakeholders.

⊟ Employment History

Lead iOS Developer at Moneybox, London
January 2021 - Present

- Provided leadership and mentorship to a team of iOS engineers, successfully supporting several team members in progressing to senior-level roles.
- Directed cross-squad collaboration and facilitated delivery across multiple development teams, ensuring alignment with product goals and timelines.
- Worked closely with product, design, and engineering stakeholders on complex project ideation, planning, execution, and reporting.
- Introduced and championed improvements to unit testing practices, significantly increasing code coverage and enhancing long-term code reliability.
- Played a key role in the redesign of the application and the implementation of new payment methods, contributing to improved user experience and feature robustness.
- Guided teams through the delivery of high-impact projects under tight deadlines, ensuring quality and timely outcomes.
- Actively involved in project planning from inception through to delivery, ensuring technical solutions remained aligned with business objectives.
- Provided regular mentoring and support to less-experienced developers, contributing to a culture of continuous learning and professional growth.

Senior iOS Developer at WorldRemit, London
March 2020 - January 2021

- Contributed to the development of the iOS application as part of an iOS Chapter.
- Created an iOS Widget for currency conversion.
- Maintained and refactored legacy code.
- Participated on a redesign of different areas of the app, contributing with cross-functional teams.
- Helped to defined development guidelines within the chapter.

iOS Developer at Tide, London
January 2019 - March 2020

- Responsible for the development of the iOS application within the squad.
- Maintained and refactored legacy code.
- Contributed to the app redesign.
- Implemented features in many sections on the app, including an receipt/transaction matching, which was widely used for businesses in order to keep a digital version of their receipts included on the transaction displayed on the app.
- Actively worked with cross-functional teams, closely to Product Managers to define features and plan the development cycle.
